BUREAU OF ANIMAL INDUSTRY.

JOHN R. MOHLER, CHIEF OF BUREAU.

SERVICE AND REGULATORY ANNOUNCEMENTS.

APRIL, 1920.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION.

APPROVAL OF STENCILS AND DIES.

The approval of imprints or blue prints of box dies and stencils may be accepted as authority to permit the use of larger dies and stencils, provided that the same style of letters and arrangement of words are preserved and that all features are proportionately enlarged. It should be understood, however, that under no circumstances should the approval of such blue prints or imprints be accepted as authority to permit the use of dies and stencils smaller than those marked with stamp of approval.

MATERIALS FOR MARKING MEAT AND MEAT FOOD PRODUCTS SUBMITTED FOR APPROVAL.

It has been difficult and sometimes impossible without further inquiry to determine the use to be made of materials submitted for approval under the meat-inspection act for marking meat and meat food products. For instance, it is important to distinguish between stencils and box dies, liners and wrappers, and labels and carton materials. Failure to identify definitely these materials and specify the use for which they are intended causes delay in approval and errors in filing and recording. It is therefore required that each such material hereafter submitted for approval shall bear a written name or statement specifying the character of marking which it represents and the use for which it is intended, in order that this information will be apparent on each copy to which the bureau stamp of approval is applied.

FIELD INSPECTION, FORM 11C REPORTS.

Reference is made to Service and Regulatory Announcements of April, 1917, pages 40 and 41, headed "Reporting Finding of Animals Affected with Contagious Disease," and to Service and Regulatory Announcements of February, 1918, page 11, headed "Reports Regarding Tuberculosis." Inspectors in charge of stations are urged to obtain the proper data relative to the origin of shipments of tuberculous cattle and swine. The bureau considers this very important information in connection with its tuberculosis-eradication campaign. Some inspectors in charge of meat inspection have demonstrated beyond a doubt that much good can be done by the cooperation of the different bureau forces in obtaining the necessary information from the packers, live-stock commission men, and others interested in the industry. This report should be made in duplicate, the original forwarded to the chief of the bureau and the duplicate to the inspector in charge of tuberculosis eradication in the State where the shipment originated.

INSPECTION AND TESTING OF ANIMALS FOR CANADA.

INSTRUCTIONS CONCERNING THE TUBERCULIN TESTING OF CATTLE FOR EXPORT TO COUNTRIES OTHER THAN CANADA.

1. Tuberculin tests applied to cattle for export to countries other than Canada may be applied either by a veterinary inspector of this bureau or by a veterinarian who is authorized by the State in which he resides and by this bureau to apply tuberculin tests to cattle intended for interstate shipment.

2. The regular T. E. Form 15 certificate should be used if the cattle are tested by a bureau veterinarian, and in other cases the usual State form may be used. Four copies of the certificate should be prepared, the original to be forwarded to the bureau, the duplicate to accompany the shipment, the triplicate to be forwarded to the proper State official of the State of origin, and the fourth copy to be forwarded to the bureau inspector in charge at the port of embarkation. The country to which the cattle are destined and the port in the United States to which the animals are going forward for embarkation should be indicated on the certificate. If the cattle are from an accredited herd or a herd in the process of accreditation, the fact should be noted on the certificate.

3. In case the cattle are tested by a veterinarian other than a bureau inspector, all four copies of the certificate prepared on the States form together with the affidavit as indicated in paragraph 4, should be forwarded to the bureau inspector in charge of tuberculosis-eradication work in the State of origin, who will indorse all four copies. If the cattle are from an accredited herd or a herd in the process of accreditation, the fact should be noted on the certificate. The inspector in charge will forward the original copy to the bureau, the duplicate to the veterinarian who applied the test or to the owner in order that it may accompany the shipment, the triplicate to the proper State live-stock sanitary official of the State of origin, and the fourth copy to the bureau inspector in charge at the port of embarkation. All four copies should plainly indicate the country to which the cattle are destined, as well as the port in the United States to which the animals are going forward for embarkation.

4. The owner of the cattle should be required to execute an affidavit as per form contained in paragraph 8 of this notice, and the affidavit should be forwarded to the bureau with the original certificate.

5. Except in the case of cattle from an accredited herd, the tuberculin test must be applied within 60 days of the date of shipment.

6. The foregoing instructions do not apply to shipments of cattle to Canada, but instructions covering shipments of cattle for that country will be found in Service and Regulatory Announcements for November, 1919, page 123.

7. If inspectors in charge of tuberculosis-eradication work know of any approved veterinarians in their territory who may apply the tuberculin test to cattle for export to countries other than Canada, it is requested that they advise them as to proper methods to follow in such cases.

8. The form of affidavit required in connection with the tuberculin testing of cattle for export is as follows:

"I,, do solemnly swear that any reactors to the tuberculin test to be made of my cattle for export to will be immediately placed in a satisfactory quarantine and held subject to the laws and regulations of the State in which tested, and that no animal presented for the test has at any time reacted to tuberculin or has received any injection of tuberculin within a period of 60 days preceding the date upon which they are offered for said tuberculin test.

AMENDMENT OF PROPERTY REGULATIONS.

Memorandum No. 299 of the Office of the Secretary, dated January 24, 1920, and designated as Amendment No. 2 to the Property Regulations, amends paragraph 31 of the Property Regulations of this department to read as follows:

"31. *Purchase from Government employees prohibited.*—No supplies or property for the use of the department shall be purchased from any of its employees without the approval of the Secretary. The request for such approval must in each case be accompanied by a statement in writing from the officer certifying the voucher showing the necessity for the purchase and indicating specifically that the purchase from the employee will be more advantageous to the Government than a purchase from any other source."

SERVICES OF BUREAU EMPLOYEES ON DAYS OBSERVED IN LIEU OF HOLIDAYS.

The bureau has received an opinion from the Solicitor's office concerning the services of its employees on meat-inspection work on days legally observed in lieu of holidays, to the effect that the Secretary is authorized by statute to prescribe rules and regulations not inconsistent with law for the government of his department and for the performance of its business, and that under this authority he designated certain holidays or the days legally observed in lieu of said holidays as days to be regarded as holidays. Since Memorial Day and Independence Day of this year fall on Sunday, the Monday following each of those days will be considered as legally observed in lieu of them. The provisions in Memorandum 288 of August 4, 1919, will therefore apply to the holiday services of all bureau employees.

THE GEORGE WASHINGTON MEMORIAL ASSOCIATION.

Members of the Department of Agriculture:

It is the plan of the George Washington Memorial Association to erect in Washington, by popular subscription, a National Victory Memorial upon a site which has been granted by the Congress. This building, appropriately called "A Temple of Patriotism," will, in a broad sense, commemorate those who have served their country in earlier wars as well as in the great struggle to uphold American rights and the civilization of the world through which the Nation has just passed. It is designed to be architecturally impressive, and, financed by popular subscription, will be for ages an enduring testimony that the people of the United States do not forget.

I commend this project to your consideration. The members of the Department of Agriculture, and in fact every citizen of the country, has a natural interest in the proposed building, not only because of the sentiment it represents but because it is to be national in its utility, providing in the Nation's capital a spacious auditorium for national gatherings, rooms for patriotic societies, and Washington headquarters for the people of each State and for housing archives and relics relating to the war. It is the plan, I understand, to have every star in the service flags throughout the whole country concretely represented by \$5 in the building fund.

While no campaign of solicitation for funds will be conducted in the Department of Agriculture, any contributions you may be inclined to make toward the erection of a memorial may be sent to the chief clerk of the department, who will receipt for them and transmit them to the proper officer of the Memorial Association.

E. T. MEREDITH,

Secretary of Agriculture.

DEPARTMENT OF AGRICULTURE WAR MEMORIAL.

Referring to the notice appearing in the March and May, 1919, issues of this publication relative to a war memorial to former departmental employees, for the information of those interested it may be stated that subscriptions to the fund now amount to \$7,548.04. The United States Senate has already approved the project and the matter is now before the proper committee of the United States House of Representatives. When it has been passed by both houses of Congress, designs will be submitted to the Commission on Fine Arts and when these are approved steps will be taken to complete the fund of \$10,000 and to erect the memorial.

NEW PUBLICATIONS OF THE BUREAU.

[The bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to officers in charge for distribution to members of their forces. The number of copies sent varies with the subject or nature of the publication and the number and class of employees. Officers in charge will use their judgment and distribute publications to best advantage. So far as possible additional copies will be furnished on request.]

HAVE YOU THE \$24?

A man bought Manhattan Island for \$24.

The point of this story is that he had the \$24.

There are scores who complain vociferously and frequently that the road to wealth is always blocked.

Yet when a small opportunity opens up the capital necessary to take advantage of it is lacking.

Where is the man so poorly paid in the United States to-day that he can not save a fraction of his earnings?
